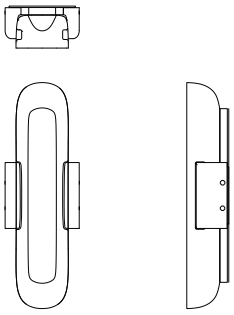
Esca Sconce No. 1

Esca, derived from the Latin word for lure or bait, are the small luminescent organs at the tip of the dorsal ray of female anglerfish. This luminous anatomy acts as a lure to attract prey.

The Esca Sconce expresses this underwater luminaire through cast glass.

The lens is available in Clear and Suede cast glass, while the cuffs are available in all cast mineral hues. Other cast glass and cast mineral colors available as custom.

The milled aluminum back plate and hardware are available in Pale Basalt and Terra.



Detail at top right: shown in Suede Cast Glass with Moonscape Cast Mineral body and Pale Basalt milled aluminum frame.
Detail at bottom right: shown in Clear Cast Glass with Moonscape Cast Mineral body and Pale Basalt milled aluminum frame.
