COUP D'ETAT

ALUMINA

BY BAROVIER&TOSO

COLLECTION DESCRIPTION

When one speaks of a wall light, we always think of something reasonable small, but this is definitively not the case with Alumina: with a side measuring 33″ ½, it is a really considerable lamp, but still giving an appearance of lightness. It is made up by five quadrangular elements decorated with submerged bubbles all completely handcrafted. To complete the composition, four decorative and differently finished metal grilles are added to the five Venetian crystal elements. Thanks to its geometry, Alumina can be used in multiple modules side by side, to create a luminous wall.
