BassamFellows introduced the Plank Table Collection as a response to a design challenge: how to make an incredibly lightweight table that would appear to almost defy gravity? The table's innovative design formula uses a triangular structure that is independent of the rectangular geometry of the top, the Plank Table's legs are thus minimized and the structural span is maximized. The result is a three-legged table with triangular cantilevers at each end, creating the illusion of a floating surface. Larger tables link two triangular structures back-to-back to form a zigzag pattern with four legs, achieving spans of up to 9 feet – the lightest possible visual to contrast the mass of the beautifully crafted solid wood plank top (some tables available with glass tops).
