COUP D'ETAT

SIDERIS TABLE LAMP

BY BAROVIER&TOSO

COLLECTION DESCRIPTION

Touch the sky with a finger: Galileo Galilei centuries ago dared to point the telescope upwards to measure the immensity of the sky, making revolutionary discoveries. The Sideris reading lamp is a tribute to Galileo's courage. The porcelain base, available in gold or platinum, supports a hand-blown Venetian crystal sphere preciously made with a double layer of gold or silver leaf. From the meeting of these unique elements a luminous revolution is born, a functional and decorative object that transforms a timeless gesture into a table lamp.
