

Clepsydra

by Barovier&Toso

Contemporary

Italy

Symmetry and order generate very elegant suspension lamps of magical charm. These are intense, bright compositions, obtained through multiplication of a single element, linking back to a design from the 1960s contained in the historical archives of Barovier&Toso. With sinuous forms for perfect matching, the hourglasses are made with the age-old Rigadin technique. The glass is blown inside a mould known as a "fracco", producing slender ribbing along the entire surface of the object. Thanks to these lines, every suspension lamp triggers a dance of luminous reflections.
