The Pewter Collection is a family of furniture pieces defined by their materiality and formal qualities. One crucible at a time, pewter is melted into liquid form and hand coated onto the steel structure, creating the other-worldly surface that makes each handcrafted pewter table unique. Through its manifestation of conceptual thought and dream like movements expressed through Christopher's knowledge of materials and craftsmanship. The material finish on each piece turns into a creation unlike any other, embodying the surface of a lunar landscape and a one-of-a-kind sculpture. Available in the simple Cocktail Table, and Console.
