

COUP D'ETAT

The Boom Table Lamp #1 *by Daniel Shapiro*

Contemporary

United States

With a shape inspired by the sound waves of a resounding rumble of a Midwest rainstorm, the Boom Lamp is painstakingly handcrafted from California Stoneware. It integrates 30 extruded patterns, each meticulously scored, slipped, and assembled with precision, aided by laser guides. After the bisque firing, a central support structure is removed, revealing the final form for glazing.

While each Boom Lamp is rooted in the same conceptual core, the crafting process of each lamp is a unique journey, resulting in a singular piece distinguished by its individual number. Available in various finishes, these lamps are customizable through commissioned orders.

Dimensions: 37" H x 14.5" DIA

Materials: Stoneware, Glaze, Electrical Components, and Glass

Item Number: LT-DS-BOOM-1

Price Upon Request.
