

CB-353 Trigon Pedestal Side Table in Copper

Trigon Pedestal Side Table

by BassamFellows

Contemporary

Italy

The BassamFellows Trigon Pedestal Side Table utilizes a triangular shape to provide a directional edge for lounge seating while allowing better clustering. Softened edges create a “guitar pick” shape that is more abstract and sculptural allowing for different layouts without looking messy. The table was the result of numerous experiments to get the optimum balance right between the top, super thin pedestal and thick steel base plate.
