

# Asymmetric Sofas

2014

Sofas

Designer Craig Bassam conceived the BassamFellows Asymmetric Sofa when he began looking for a stylish, scalable sofa that would be suitable for his personal study. He wanted a piece that would harmonize two competing needs – a sofa that would work during collaborative meetings whilst being appropriate for personal contemplation. Asymmetric is the quintessential landscape sofa group, which achieves asymmetrical or informal balance using closed and open elements that appear divergent, but carry equal visual weight. The group consists of three different lengths of sofa units, a corner unit, a chaise, and an ottoman. The planning module allows for a multitude of layout arrangements from a typical sofa format to landscape configurations where armed, armless, and backless elements can be combined to vary the horizon line of the piece and open it up to the room. Regardless of its configuration, the Asymmetric offers a supremely comfortable sit.

## Asymmetric Sofas

2024

Sofas

We have expanded our Asymmetric Sofa Collection to include deeper, more relaxed elements. Production has been moved to a facility in the Como area of Lombardy, a workshop we consider one of the best in the industry. The shift is apposite – while we have always structured and proportioned our sofas according to what we believe make for the most conducive configuration for conversation, we appreciate the comfort and scale of typical Italian designs. The Asymmetric Grand Sofa is influenced by those proportions but retains intimacy. There's an exaggeration of depth, but it's still subtle, and entirely BassamFellows in spirit.

Crucially, the Grand elements have been designed so they can be paired in a modular fashion with the existing Asymmetric Sofa.
