

Circular Side Table

2002

Occasional Tables

The Circular Table Collection marries pure geometry with high craft. From above, the piece emanates a strong geometric identity given that the circle is divided equally into wedge shapes with the grain of the wood radiating from the center. The tabletop is cut into three equal segments separated by a reveal and held together on the underside with a stainless-steel ring. The reveal allows the pie-shaped solid wood wedges to move freely with variations in humidity eliminating warping and splitting. A sturdy but agile floating presence is created by the table's base, made from circular sections of tubular stainless steel.
