Lounge Chairs

The BassamFellows Petal Chair is the most advanced 3D molded wood veneer chair ever put into commercial production. It takes some of its inspiration from Saarinen's Tulip chair, and also offers a dialogue with the history of the Charles and Ray Eames experiments. The super-shaped wood mimics the unfolding of flower petals, creating a comfortable ergonomic form. The back is wider at its top to provide support, while rolled waterfalls of shaped wood soften the edges. Petal's appeal is accentuated by the visual grain of the wood, which resembles the fine detail on a flower – the lines emanating outwards in the direction of a bloom.
