VENEZIA 1295

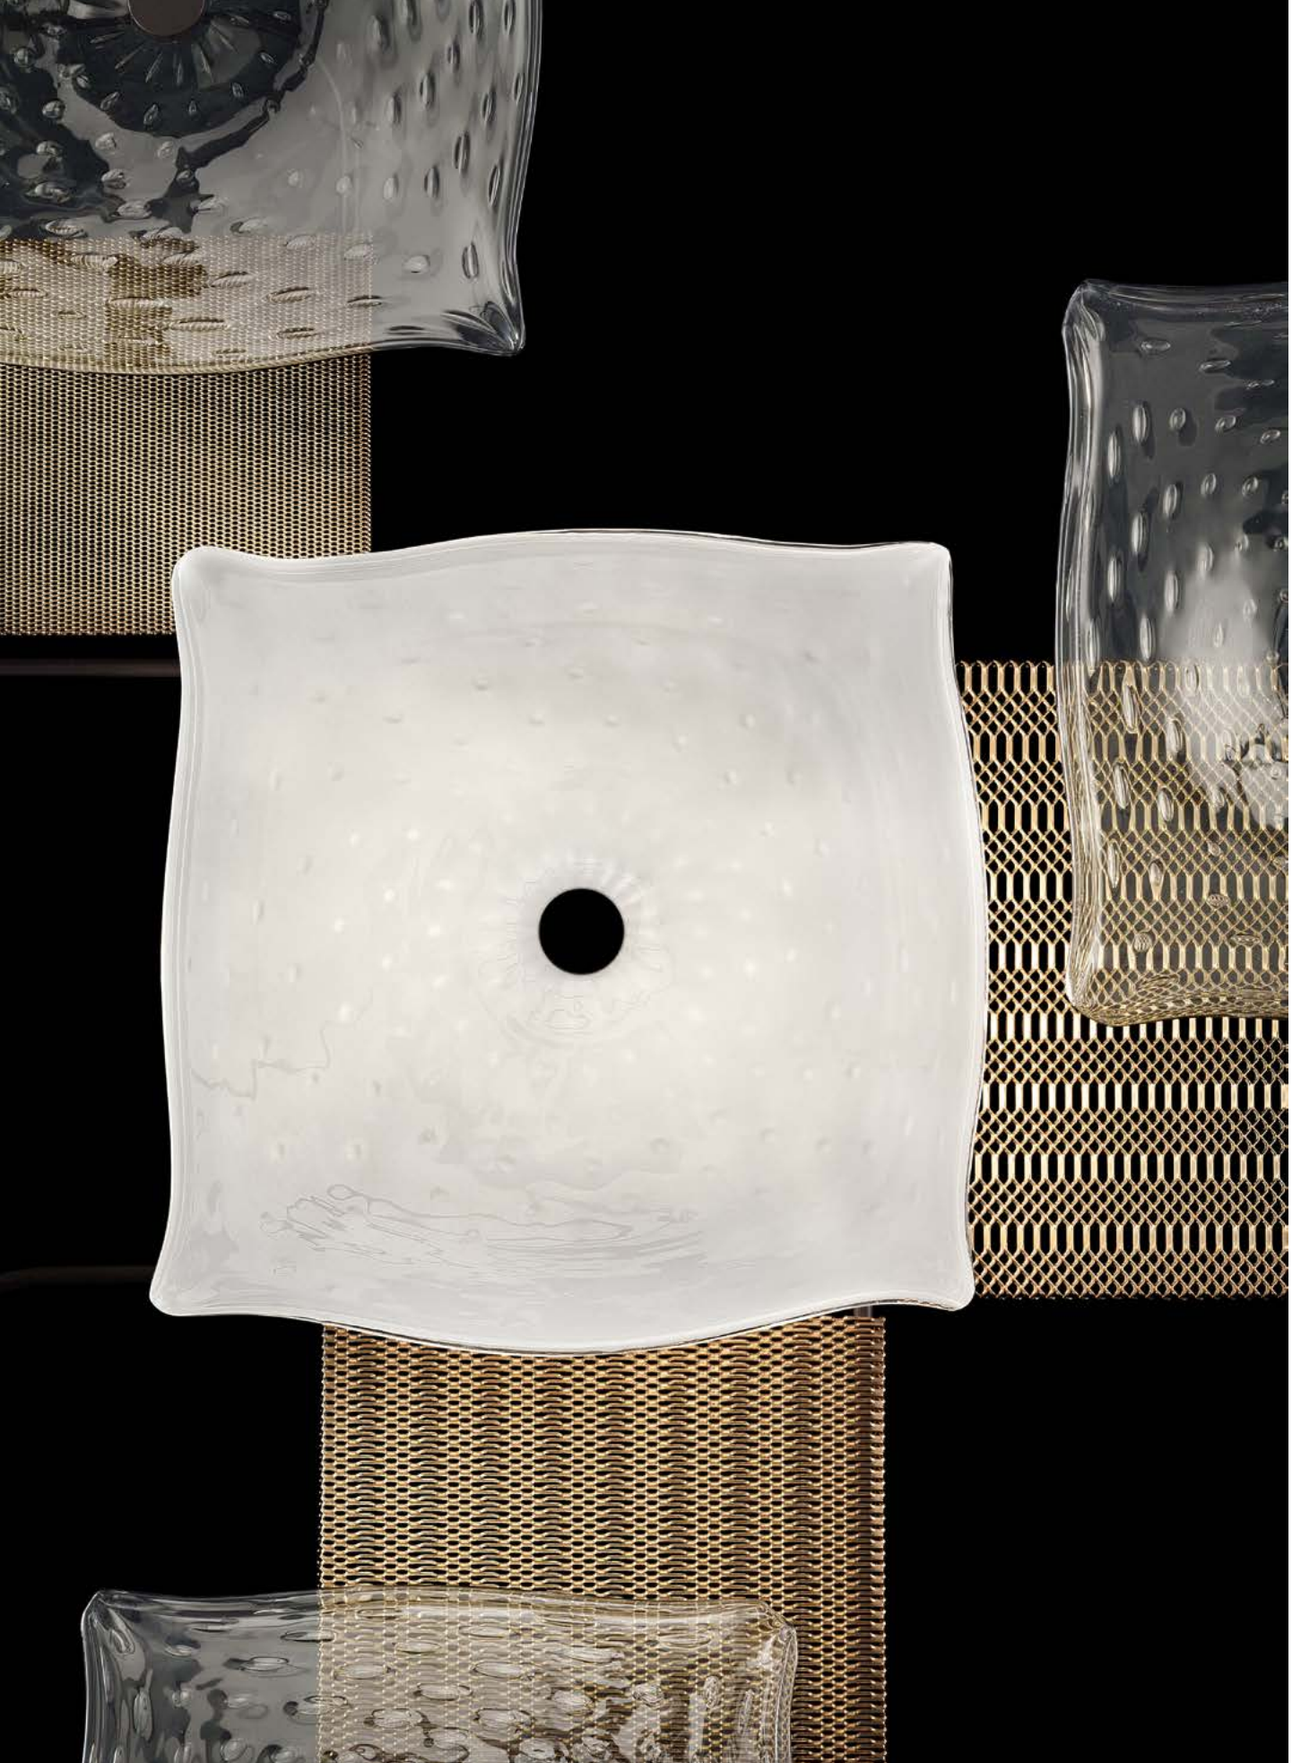

ALUMINA

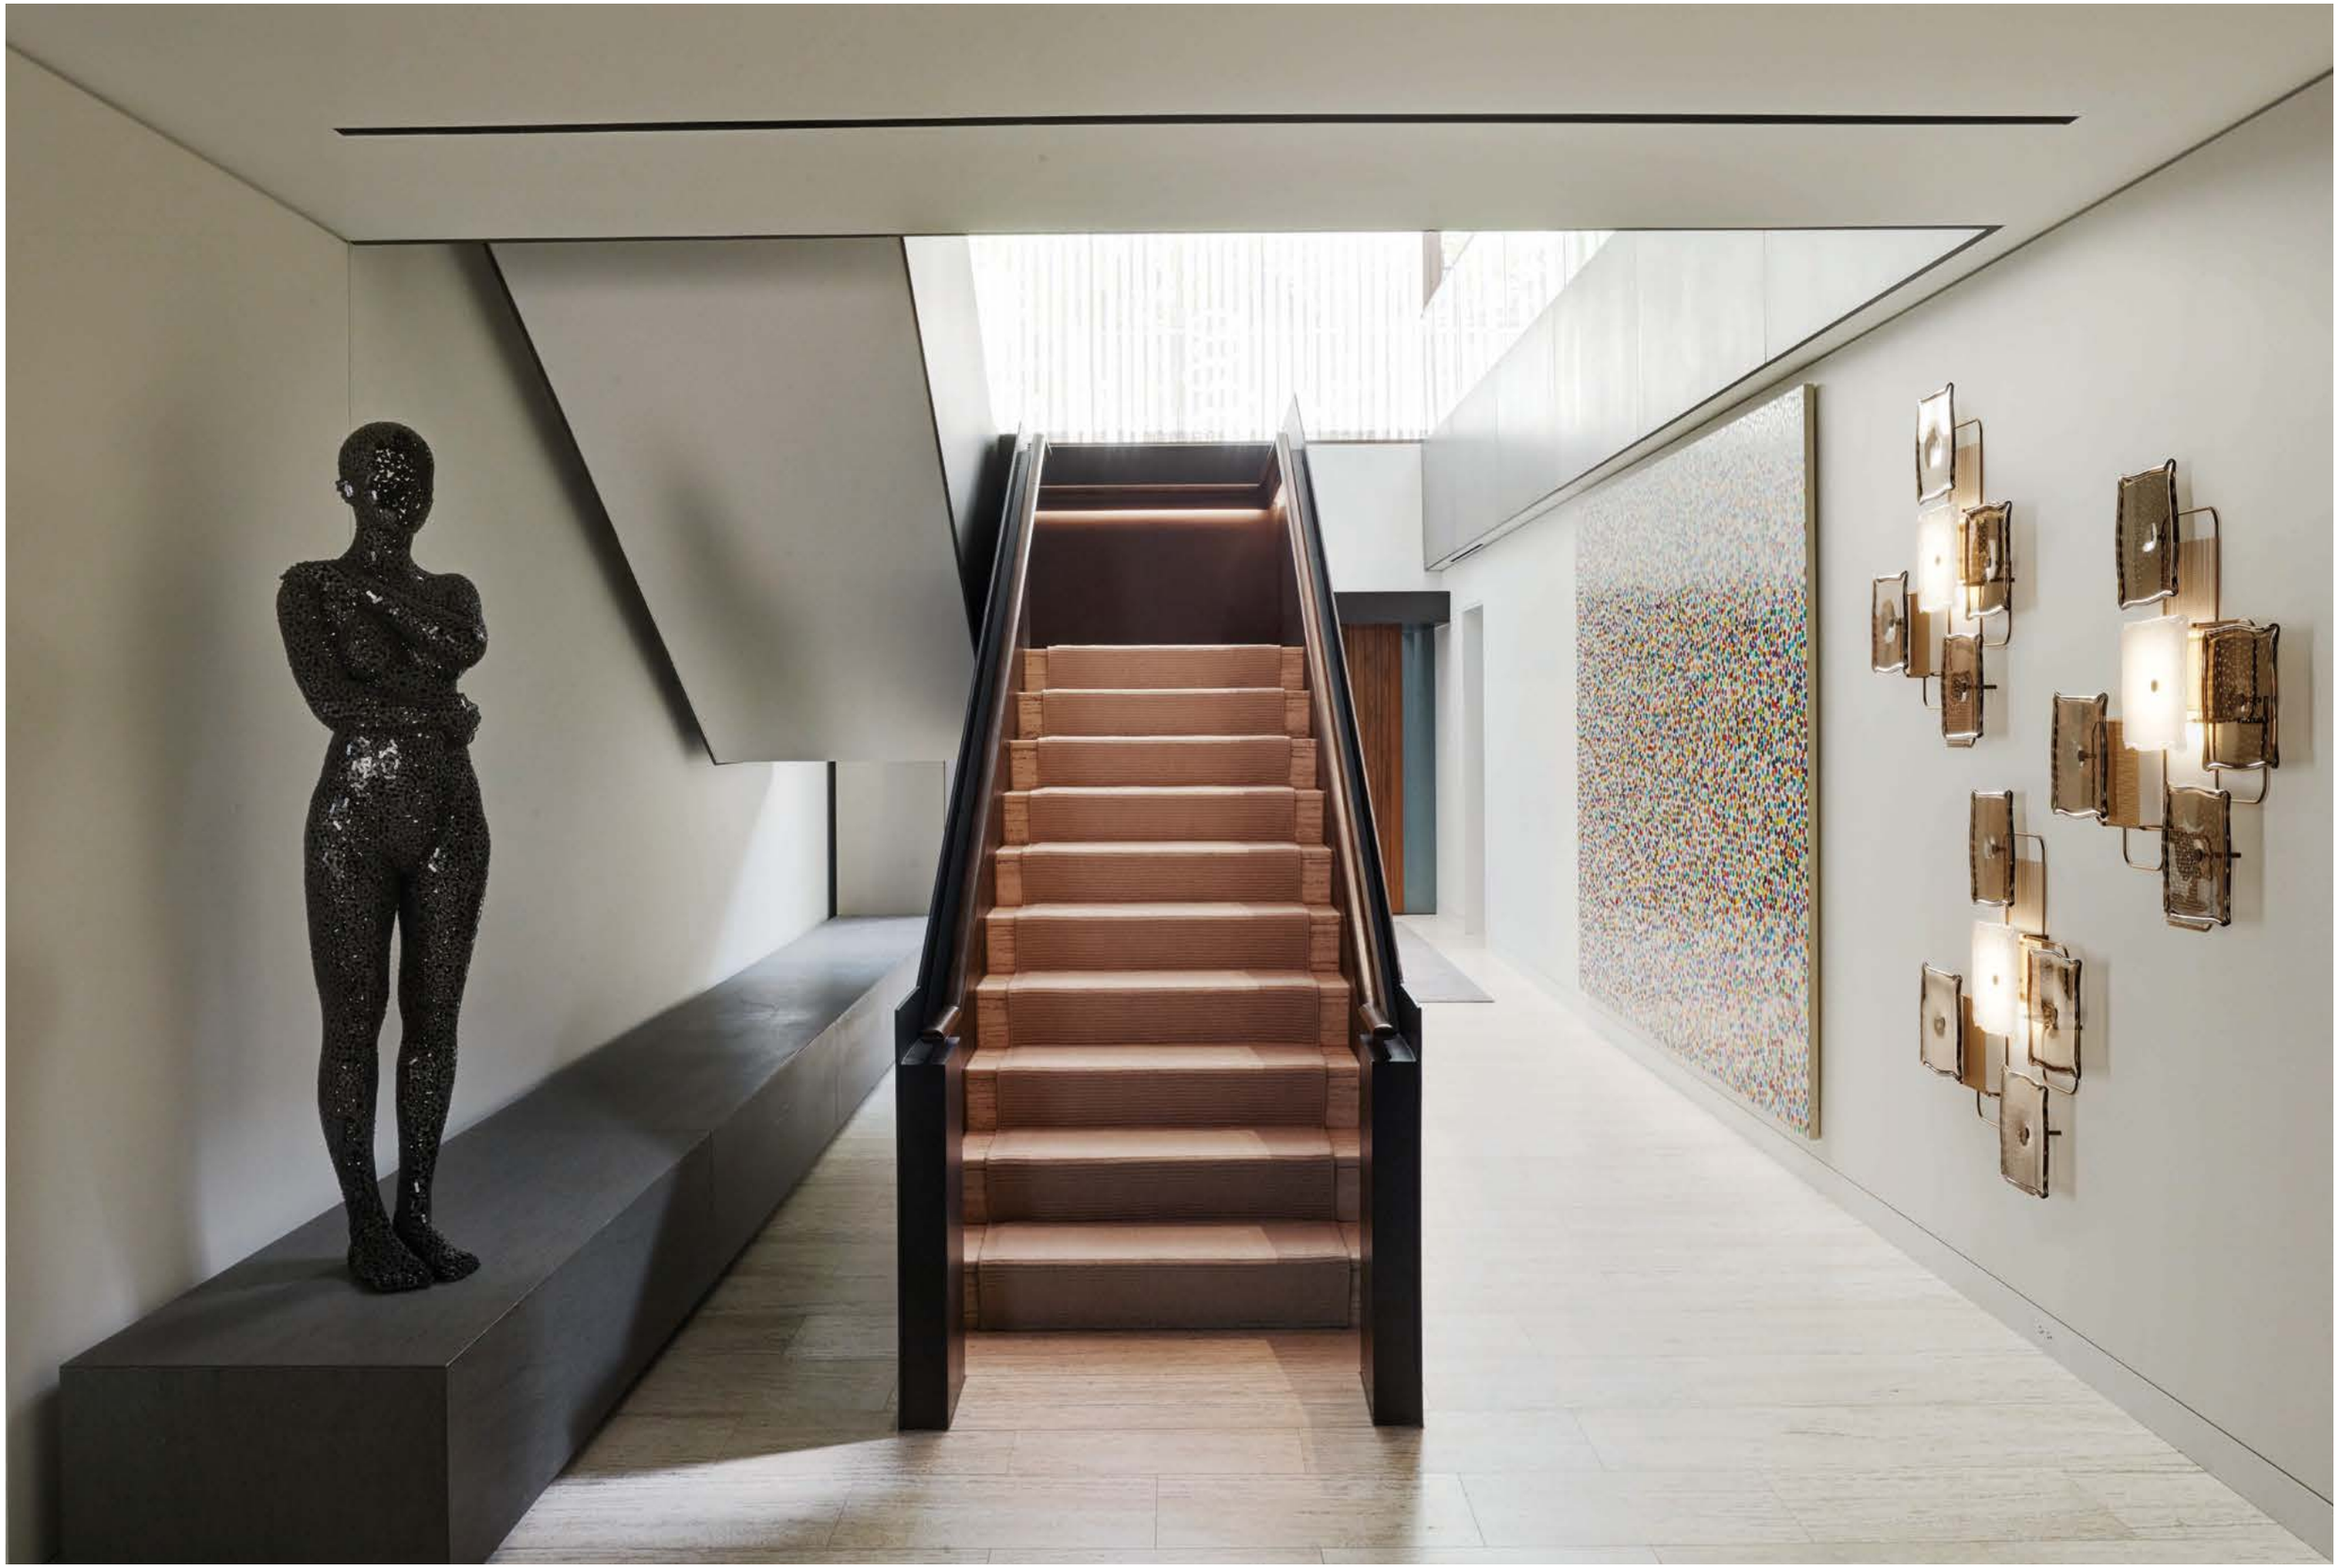

Alessandro Piva

Con un lato di 85 centimetri, è una plafoniera ed una lampada da parete davvero importante, ma comunque leggera nell'aspetto. È composta da cinque elementi quadrangolari decorati a bolle sommerse e realizzati completamente a mano. A completare la composizione, ai cinque elementi in cristallo veneziano si aggiungono quattro griglie decorative in metallo a trama diversa. Grazie alla sua geometria, Alumina può essere utilizzata in molteplici unità affiancate, a formare una parete luminosa.

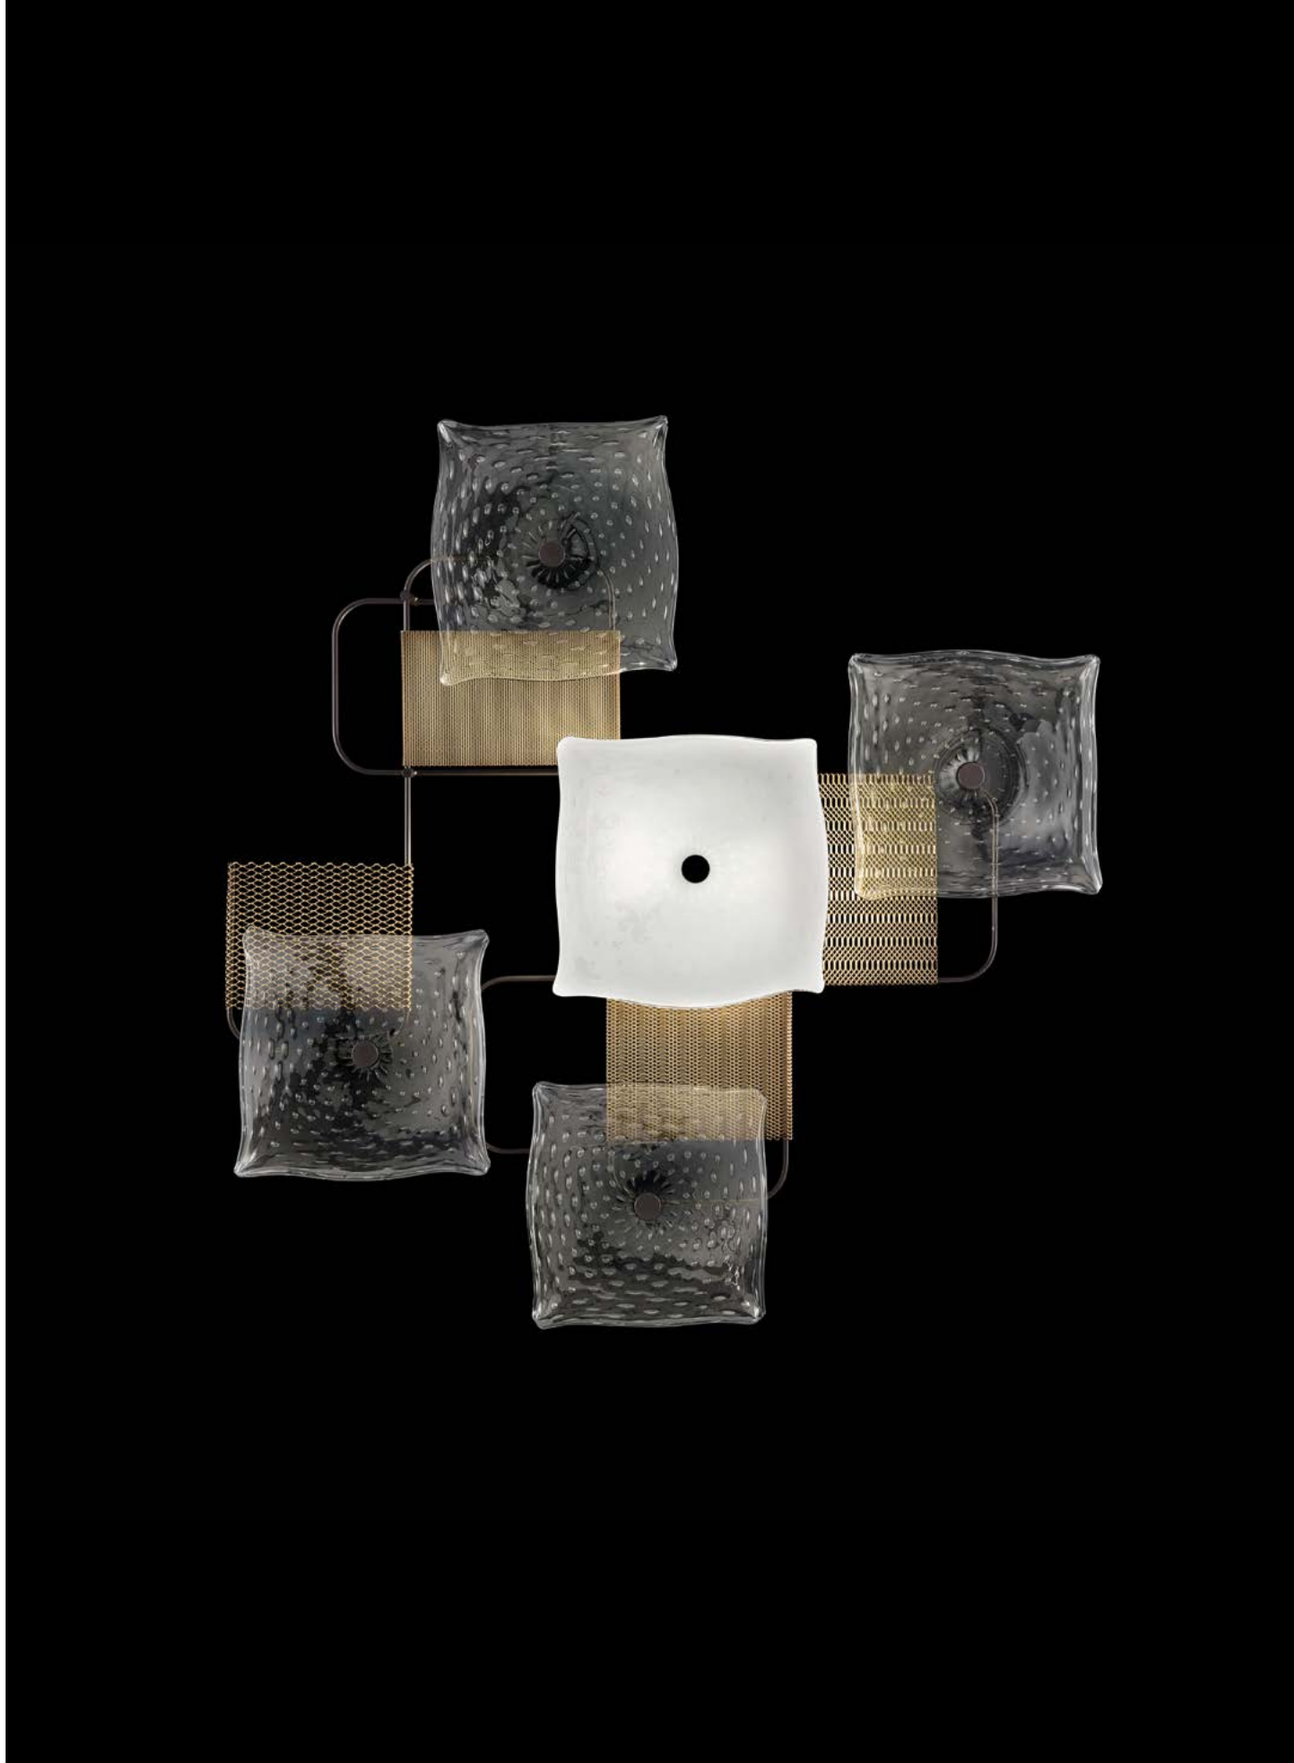

With a side measuring 33 ½," Alumina is a really considerable ceiling lamp and wall sconce, but still giving an appearance of lightness. It is made up by five quadrangular elements decorated with submerged bubbles all completely handcrafted. To complete the composition, four decorative and differently finished metal grilles are added to the five Venetian crystal elements. Thanks to its geometry, Alumina can be used in multiple modules side by side, to create a luminous wall.
